New Criteria

Revision of Existing Criteria

Executive Summary

Purpose: The purpose of this monograph is to provide a review of new therapy to determine whether the reviewed drug should be made available on an open access basis to prescribers, require a clinical edit or require prior authorization for use.

Dosage Forms: DermacinRx Surgical Pharmapak™ is supplied in a kit that contains 22 g of 2% mupirocin ointment, 8 oz of 4% chlorhexidine gluconate, 4 oz of 5% dimethicone, and 1 roll of silicone tape.

Manufacturer: PureTek Corporation, San Fernando, CA 91340

Indications: DermacinRx Surgical Pharmapak™ is used in preparation for surgery and post-surgery. Chlorhexidine is a topical antiseptic that is used to wash the night prior to and the morning of the procedure. Mupirocin is a topical antibiotic that is applied to the wound for 3-5 days to prevent infection. Dimethicone and silicone tape are used on healed wound to repair skin.

Costs: Pricing information not available.

Summary of Findings: The MO HealthNet Division recommends prior authorization status for this product.

Status Recommendation: Prior Authorization (PA) Required Open Access
 Fiscal Edit PDL

Type of PA Criteria: Increased Risk of ADE Non-Preferred Agent
 Appropriate Indications No PA Required
