New Criteria

Revision of Existing Criteria

Executive Summary

Purpose: The purpose of this monograph is to provide a review of new therapy to determine whether the reviewed drug should be made available on an open access basis to prescribers, require a clinical edit or require prior authorization for use.

Dosage Forms: DermacinRx Prenatrix is available as a 30-count bottle of caplets containing a prenatal multivitamin with 27 mg of iron and 1 mg of folic acid.

Manufacturer: Distributed by: PureTek Corporation, San Fernando, CA 91340

Indications: DermacinRx Prenatrix is indicated for nutritional supplementation of females of child-bearing potential during pre-conception, pregnancy or lactation.

Costs: \$1,680 per 30 caplets of DermacinRx Prenatrix. Wholesale Acquisition Cost

Summary of Findings: The MO Healthnet Division recommends adding this drug to the current high cost kit fiscal edit.

Status Recommendation: Clinical Edit Fiscal Edit
 Open Access PDL

Type of PA Criteria: Appropriate Indications Non-Preferred
 No PA Required Preferred
